

Spoken Tutorial – Misinformation and Deepfakes

Title: Misinformation and Deepfakes

Module	AI Ethics
Episode	Misinformation and Deepfakes
Learning Objective	At the end of this tutorial learner will be able to 1. Understand how AI creates fake content 2. Identify risks of deepfake media 3. Learn to verify sources 4. Recognize the impact of misinformation
Approx. Duration	3-4 min
Outline	• How AI can generate realistic fake content • Risks of deepfake audio, video, and images • Real-world examples and societal impact • Importance of source verification and media literacy
Meta Tags	AI, Deepfakes, Misinformation, Ethics, Media Literacy, Source Verification
Pre-requisite Tutorial	Basic understanding of AI concepts.

Script

Visual Cue	Narration
Title Slide	Welcome to this Spoken Tutorial on Misinformation and Deepfakes.
Learning Objectives Slide	In this tutorial, you will learn to understand how AI creates fake content. You will also identify the risks of deepfake media. Furthermore, you will learn to verify sources. You will also recognize the impact of misinformation.
System Requirements Slide	You will need a device with internet access. No specific software is required for this tutorial.
Pre-requisite Slide	A basic understanding of what AI is will be helpful. No prior technical knowledge is needed.
AI generating fake images	Can AI create things that are not real? Yes, AI can generate very convincing fake content. This includes fake audio, video, and images. AI learns patterns from vast amounts of data.
Deepfake creation process	This technology is often called deepfake . Think of it like an artist who learns to paint. The artist can then create new, realistic paintings. AI does this with faces, voices, and actions.

Warning sign for deepfakes	What are the dangers of such fake content? Deepfakes can spread false information very quickly. They can make someone appear to say or do anything. This can harm reputations and cause confusion.
Fake news headline, deepfake video	Imagine a fake video of a politician. It shows them saying something they never said. This can influence public opinion wrongly. You saw the impact. Now reflect on this.
Global impact of misinformation	Have deepfakes caused real problems? Yes, deepfakes have been used in many hoaxes. They have targeted public figures and common people. This technology can even impact elections.
Cybercrime, deepfake scam	For example, a deepfake audio could mimic a CEO's voice. It could then trick employees into transferring money. This shows the financial and social dangers. Now we learn how to protect ourselves.
Magnifying glass checking news source	How can we tell if content is real or fake? Always question the source of information. Check if the content comes from a trusted channel. Look for official websites or news outlets.
Person evaluating digital content	This skill is called media literacy. It helps us critically evaluate what we see. Look for inconsistencies in lighting or sound. Unusual facial expressions can be a sign.
Brain thinking, critical evaluation	Does the story sound too good or too bad to be true? Pause and think before you share anything. Cross-check facts with multiple reliable sources. This helps us fight the spread of misinformation.
Summary Slide	In this tutorial, we understood how AI creates deepfakes. We identified the risks of misinformation. We learned the importance of source verification. We also discussed media literacy skills.
Assignment Slide	Find a news article reporting a deepfake incident. Analyze how the deepfake was detected. Write a short paragraph on its impact. Share your findings with a friend.
