

Spoken Tutorial – Misinformation and Deepfakes

Title: Misinformation and Deepfakes

Module	AI Ethics and Safety
Episode	03
Learning Objective	At the end of this tutorial learner will be able to 1. Understand how AI creates fake content. 2. Identify risks of deepfake media. 3. Learn to verify digital sources, and 4. Apply media literacy skills.
Approx. Duration	3-4 min
Outline	• What are deepfakes? • How AI generates fake content. • Risks of deepfake media. • Real-world deepfake examples. • Verifying digital sources. • Building media literacy.
Meta Tags	AI, Deepfakes, Misinformation, Media Literacy, Ethics, Safety
Pre-requisite Tutorial	Basic understanding of AI concepts.

Script

Visual Cue	Narration
Title Slide	Welcome to this Spoken Tutorial on Misinformation and Deepfakes.
Learning Objectives Slide	In this tutorial, you will learn to understand how AI creates fake content. Next, you will learn to identify risks of deepfake media. Then, you will learn to verify digital sources. Finally, you will apply media literacy skills.
System Requirements Slide	You will need a device with internet access. A web browser is also required.
Pre-requisite Slide	Basic understanding of AI concepts is helpful. Familiarity with digital media is also useful.
AI generated fake content	What exactly are deepfakes ? They are synthetic media. AI generates them to look real. They can be audio, video, or images.

Neural network creating deepfakes	How does AI make these? It uses special ML models. These models learn from real data. Then they create new, fake content.
People looking at fake news on screens	What are the dangers? Deepfakes can spread false news. They can harm reputations. They can even influence elections. This poses a serious threat.
Fake video of a public figure speaking	Consider a fake speech. An AI can mimic a voice perfectly. It can also swap faces in videos. This makes fake events seem real. Remember the recent fake news reports.
Magnifying glass over a digital screen	How can we check content? Always question the source. Look for inconsistencies in media. Check for strange movements or audio. Use reliable fact-checking websites.
Person thinking critically about news	What is media literacy? It is the ability to analyze media. You learn to spot manipulation. This skill protects you online. Practice critical thinking always.
Summary Slide	We explored deepfakes and AI . We saw how AI creates fake content. The risks of misinformation are high. Verifying sources is very important. Media literacy helps us stay safe.
Assignment Slide	Find a news article online. Check its source carefully. Identify three signs of credibility. Share your findings with a friend.
