

Spoken Tutorial on API

Module	Module 3: An introduction to Building
Episode	1. Introduction to APIs
Learning Objective	At the end of this tutorial learner will be able to 1. Define what an API is. 2. Explain the function of an API key. 3. Identify how an API request is made.
Approx. Duration	3-4 min
Outline	• What is an API? • API Keys and Requests
Meta Tags	API, AI, programming, interface, key, request, development, model, application, software
Pre-requisite Tutorial	Module 2:Art of the Prompt

Script

Visual Cue	Narration
Title Slide	Welcome to this Spoken Tutorial on API .
Learning Objectives Slide	In this tutorial, you will learn to, • Define what an API is. • Explain the function of an API key. • Identify how an API request is made.
System Requirements Slide	Here I am using a browser on a computer or mobile.
Pre-requisite Slide	To follow this tutorial, you should have completed Module 2: Art of the Prompt .
Illustration showing API as a waiter connecting a customer (application) to a kitchen (AI model)	Imagine you are at a restaurant and want to order food. What do you do? You tell your order to the waiter, right? The waiter takes your order to the kitchen. Then, the kitchen prepares your food. Finally, the waiter brings your food back to you. An API , or Application Programming Interface , works in a similar way. Think of an API like that restaurant waiter. It takes your application's request to the AI model. Then, it brings the AI model's response back to your application.

Illustration showing a key unlocking a secure gate, representing an API key for access	Now, how does this 'waiter' know it's you? It needs an identification. An API Key is like a secret password. It is your unique ID card for accessing the AI service. This key tells the AI that you are allowed to make a request. A request is when you send this API key along with your prompt. You send it to the AI service to place your 'order'. It's like showing your ID to enter a secure building.
Summary Slide	Let us summarize what we learned. We defined APIs as messengers. We understood API keys as access credentials. We also learned about making API requests.
Assignment Slide	Now as an assignment. Explain in your own words how an API facilitates communication. It connects applications and AI models. Compare the results.
