Course Outline

- Every script should be written such that **75-80%** of the content is the **demonstration**.
- Keep theory to a minimum.
- Do not use the Menu-based approach to explain the features of the software.
- Cover crucial and important features in detail.
- Avoid repetitions across the outline or across scripts or within a script.
- Provide quick pointers for less important features.
- Avoid spending too much time on topics which learners can figure out on their own.
- Refer to other features in assignments with an appropriate number of hints to help the learner..
