

The Art Of The Prompt - A Guide For Everyone

Module:	Effective AI Prompting
Episode:	Episode 1: The Art of the Prompt
Learning Objective:	At the end of this tutorial learner will be able to 1. Define what a prompt is and explain its importance for useful responses from AI tools. 2. Construct clear and specific prompts using essential details and relevant keywords. 3. Modify prompts to provide context, assign roles to the AI, and specify desired output formats. 4. Evaluate and improve initial AI responses by refining prompts for better and accurate results.
Approx. Duration:	3-4 min
Outline	• Introduction to Prompts • Prerequisites for Using AI Tools • Core Concept 1: Be Clear and Specific • Core Concept 2: Add Context and Role • Core Concept 3: Specify Output Format • Practical Activity: Writing a Leave Application Prompt • Summary and Next Steps
Meta Tags	AI prompting, chatgpt tutorial, bard tutorial, how to write prompts, AI instructions, spoken tutorial, IIT Bombay, EduPyramids
Pre-requisite Tutorial	Basic computer or smartphone use, access to a basic AI chat tool.

Slide : The Art Of The Prompt - A Guide For Everyone

Visual Cue	Narration
Title slide with 'The Art of the Prompt - A Guide for Everyone', modern AI-themed background, subtle EduPyramids logo, FOSSEE IIT Bombay logo, professional and clean design.	Hello everyone. Welcome to this Spoken Tutorial on The Art Of The Prompt. My name is [Your Name / Instructor's Name].

Slide : Learning Objectives

Visual Cue	Narration
------------	-----------

Graphic showing four learning objectives related to AI prompting, simple icons for each objective: a question mark for define, a builder for construct, a person in different roles for modify, a magnifying glass for evaluate.	At the end of this tutorial, you will be able to: Define what a prompt is and why it is important for AI tools. Construct clear and specific prompts by including essential details. Modify prompts to provide necessary context, roles, and output formats. And finally, evaluate and improve initial AI responses for better results.
--	---

Slide : Prerequisites

Visual Cue	Narration
Person using a laptop and a smartphone, beside them a simple graphic of an AI chat interface on a browser window, indicating basic tech access.	Before we start, let us check the prerequisites. You should know basic computer or smartphone use. Also, you should have access to a basic AI chat tool. For example, you can use `chat.openai.com` or `bard.google.com`. Please keep your chosen AI chat tool ready to use.

Slide : What Is A Prompt?

Visual Cue	Narration
Person speaking into a stylized AI interface, with a speech bubble saying 'prompt'. Next to it, a clear illustration of a person bringing a specific red book from a top shelf, contrasting with a person confused about 'any book'.	First, what is a prompt? A prompt is a set of instructions you give to an AI program. Think of it like asking a smart helper for something specific. If you say 'Bring a book', they might bring any book. It is vague.

Slide : Core Concept 1: Be Clear and Specific

Visual Cue	Narration
Image showing a magnifying glass focusing on a detailed instruction 'Write about rose for children', with a vague instruction 'Tell me about flowers' next to it appearing blurry and less effective.	Our first core concept is: Be Clear and Specific. AI tools do not guess what you mean. They follow your words exactly. Tell the AI what you want, who it is for, and important details. For example, 'Tell me about animals' is too broad.

Slide : Core Concept 2: Add Context and Role

Visual Cue	Narration
Two figures, one representing a user, asking a question to a robot. The robot has a thought bubble containing a teacher's cap and a context bubble indicating 'student's brother asking about solar system', showing understanding of role and context.	Next, let us learn to Add Context and Role. Context gives the AI background, helping it understand your situation. Role helps the AI respond in a specific style, like an expert. Doctors give better advice if they know your health history.

Slide : Core Concept 3: Specify Output Format

Visual Cue	Narration
Computer screen showing different data formats: a bulleted list of items, a numbered list with descriptions, and a short, structured paragraph, emphasizing that the user can choose the output structure.	Our last core concept is: Specify Output Format. You might need information presented in a specific way. Telling the AI the format saves you time in organizing later. For example: 'Tell me about healthy fruits.'

Slide : Practical Activity: Leave Application

Visual Cue	Narration
Student typing a complex, structured prompt into an AI chat window for a leave application, showing a draft application on the screen with placeholders, demonstrating the combination of learned concepts.	Now, let us do a practical activity. Scenario: You need help writing a leave application for school or college. Task: Create an AI prompt for a formal one-day leave application. First, start with a clear request: 'I need a leave application.' Next, add context and a role. For instance, 'You are a helpful assistant,' and mention 'my class teacher.'

Slide : Summary

Visual Cue	Narration
------------	-----------

Infographic with three main points summarized: 'Clear & Specific' with a magnifying glass, 'Context & Role' with a persona icon, 'Output Format' with a structured document icon. Clean and minimalist design.	Let us quickly summarize what we have learned. Remember these three key takeaways for effective prompting: First, always be clear and specific in your prompts. Give enough details so the AI understands. Second, provide context and assign a role to the AI.

Slide : Assignment

Visual Cue	Narration
Person sitting at a desk with a notebook and a laptop, thinking about how to learn a new skill, a checklist graphic nearby. The scene conveys contemplation and active learning.	Here is an assignment for you. Use an AI tool to generate five tips for learning a new skill. Ensure the AI acts as an expert mentor. Present the tips as a bulleted list. Each tip should include a one-sentence explanation.
