

The Art of the Prompt - A Guide for Everyone

Module:	Introduction to AI Tools
Episode:	1: The Art of the Prompt - A Guide for Everyone
Learning Objective:	At the end of this tutorial learner will be able to 1. Understand what a prompt is and its importance for AI tools. 2. Identify the key elements that make a prompt effective. 3. Construct clear and specific prompts for various tasks. 4. Refine prompts to get more useful and accurate results from AI tools.
Approx. Duration:	3-4 min
Outline	• Introduction to Prompts • Why Prompting is Important • Prerequisites for the Tutorial • System Requirements • Core Concept 1: Being Clear and Specific • Core Concept 2: Adding Context and Role • Core Concept 3: Specifying Format and Length • Practical Activity: Planning a Simple Daily Schedule • Summary and Next Steps
Meta Tags	AI prompting, generative AI, AI tools, prompt engineering, clear prompts, specific prompts, context in AI, role-playing AI, prompt format, AI tutorial for beginners
Pre-requisite Tutorial	Basic computer knowledge (keyboard, mouse, web browser), access to a generative AI tool (e.g., Google Gemini, ChatGPT, Copilot), and basic English language understanding.

Slide : The Art of the Prompt - A Guide for Everyone

Visual Cue	Narration
A clean, modern title slide with the text 'The Art of the Prompt - A Guide for Everyone'. Incorporate abstract AI elements like glowing neural networks or digital patterns in a subtle way. FOSSEE, IIT Bombay logo visible.	Welcome to 'The Art of the Prompt - A Guide for Everyone' tutorial. Learning good prompting helps you use AI tools effectively. Let's explore how to get better AI interactions.

Slide : Learning Objectives

Visual Cue	Narration
------------	-----------

A slide listing four learning objectives. Use simple icons next to each objective like a lightbulb for 'understand', a magnifying glass for 'identify', a building block for 'construct', and a refining tool for 'refine'. Clean, educational style.	By the end of this tutorial, you will be able to: Understand what a prompt is and its importance. Identify key elements of effective prompts. Construct clear and specific prompts. And refine prompts for better AI results.
--	--

Slide : Prerequisites

Visual Cue	Narration
A slide showing three simple icons representing the prerequisites: a computer keyboard and mouse, a smartphone/tablet with an AI chat interface, and a book with English text. Clear, simple design.	To follow along, you need basic computer knowledge. This includes using a keyboard and mouse. Also, have access to an AI tool, like Google Gemini or ChatGPT. Finally, you should understand basic English.

Slide : System Requirements

Visual Cue	Narration
A computer screen displaying a web browser open to an AI chatbot interface, next to a smartphone showing the same. Wi-Fi signal icon present. Minimalist and clear.	You will need a computer or a smartphone. Ensure you have a stable internet connection. And a web browser like Chrome or Firefox. These allow you to access AI tools easily.

Slide : Concept Introduction: What is a Prompt?

Visual Cue	Narration
An illustration of a person typing a question into a glowing AI chatbot interface, with a thought bubble above the AI showing generated text. Simple, clear, and modern.	What is a prompt? Imagine you tell a smart helper what you need. For example, 'Tell me a story about a brave rabbit'. This instruction is a prompt.

Slide : Concept Development: Why Prompting is Important?

Visual Cue	Narration
Two contrasting scenes: on the left, a confused shopkeeper reacting to a vague request (speech bubble 'some food'); on the right, a happy shopkeeper giving specific items (milk and bananas) to a customer with a clear request. Cartoon style, easy to understand.	Why is prompting important? If you ask a shopkeeper for 'some food', you might get anything. Ask for 'one packet of milk', you get what you need. A good prompt is like asking clearly.

Slide : Core Concept 1: Be Clear and Specific

Visual Cue	Narration
On the left, a cloud with a question mark, representing vague prompts. On the right, a magnifying glass focusing on a specific item, representing clear and specific prompts. Use a world map outline as background for the 'India' example.	Our first concept: Be Clear and Specific. Vague prompts, like 'Tell me about India', confuse AI. You may not get what you wanted. Decide exactly what information you need. Use simple, direct words.

Slide : Core Concept 2: Add Context and Role

Visual Cue	Narration
A split image: on the left, an AI chatbot icon with a question mark about user's context. On the right, the AI icon wearing various 'hats' (e.g., a graduation cap for student, a stethoscope for doctor) with text bubbles showing clear role and context. Dynamic and illustrative.	Next, we learn about 'Adding Context and Role'. AI tools do not know your situation. Giving context helps AI understand your needs. Tell the AI its role, like 'You are a teacher'. Example: As a student, email your professor for an extension.

Slide : Core Concept 3: Specify Format and Length

Visual Cue	Narration
------------	-----------

A graphic demonstrating different output formats: a bulleted list, a numbered list, a short paragraph, and a table. A ruler icon or a counter for 'length' is also shown. Clean, professional data visualization style.	Finally, Specify Format and Length. AI can give answers in many ways. Tell AI how you want the answer structured, like 'in bullet points'. Also, specify the length, for example, 'in 100 words'. Example: 'List five benefits of exercise, as a numbered list'.
---	--

Slide : Practical Activity: Planning a Daily Schedule

Visual Cue	Narration
A split screen showing: on the left, a student at a desk, looking at a blank planner. On the right, an AI chatbot interface displaying a generated daily schedule in a table format. Highlight the prompt input area and the table output clearly.	Let's combine all concepts for a practical activity. We will plan a daily schedule for a student using AI. Here is the full prompt to use: You can see it on your screen. Pause this video now. Type this prompt into your AI tool.

Slide : Summary and Next Steps

Visual Cue	Narration
A clean slide with three main bullet points summarizing 'Clear and Specific', 'Context and Role', and 'Format and Length' with small icons. Below, text 'Practice, Practice, Practice!' and the FOSSEE, IIT Bombay logo clearly displayed. Encouraging and conclusive.	Let's quickly summarize. Be clear and specific. Provide context and role. Specify format and length. Good prompting is giving clear instructions. Keep practicing to improve your skills.
