

Prompting: Your Essential AI Skill

Module:	AI Fundamentals
Episode:	Episode 1: The Basics of Good Prompts
Learning Objective:	At the end of this tutorial learner will be able to 1. Identify the three key components of an effective prompt: Clarity, Context, and Constraints. 2. Apply clarity, context, and constraints to write effective prompts. 3. Refine AI outputs through iterative prompting.
Approx. Duration:	3-4 min
Outline	• Introduction to AI Prompting • Understanding the 3 C's: Clarity, Context, Constraints • Using Persona and Structured Output • The Power of Iterative Prompting • Hands-on Practice with AI Tools
Meta Tags	AI, Prompt Engineering, ChatGPT, Gemini, Claude, AI tools, instruction, clarity, context, constraints, iterative prompting, persona
Pre-requisite Tutorial	Basic understanding of what AI tools like ChatGPT or Gemini are. Access to an AI chatbot for practice.

Slide : Welcome to Prompting: Your Essential AI Skill

Visual Cue	Narration
A warm welcome slide with the tutorial title, and logos of EduPyramids and FOSSEE, IIT Bombay.	Welcome to this Spoken Tutorial on Prompting. My name is [Your Name / EduPyramids Team].

Slide : Learning Objectives

Visual Cue	Narration
An infographic showing three bullet points representing learning objectives, with icons for identification, application, and refinement.	At the end of this tutorial, you will be able to: Identify the three key components of an effective prompt. Apply clarity, context, and constraints to write better prompts. And, refine AI outputs through iterative prompting.

Slide : Prerequisites

Visual Cue	Narration
------------	-----------

Icons representing a smartphone with an AI chat interface and a thought bubble, alongside a computer screen.	To follow this tutorial, you should have a basic understanding of AI tools. For example, tools like ChatGPT or Google Gemini. You will also need access to an AI chatbot for practicing later.
--	--

Slide : System Requirements

Visual Cue	Narration
Illustration of a computer and a smartphone connected to the internet, with a web browser icon.	You will need an internet-connected computer or smartphone. And a web browser like Chrome or Firefox. This will allow you to access the AI tools for practice.

Slide : Prompting: Talking to AI

Visual Cue	Narration
An illustration of a person talking to a friendly robot or AI assistant, showing clear and effective communication.	Imagine you have a very smart intern. This intern can do amazing things but needs very specific instructions. Prompting is exactly that.

Slide : The 3 C's of a Good Prompt: Clarity

Visual Cue	Narration
A magnifying glass highlighting the word 'Clarity', with a clear, specific example prompt contrasted with a vague one.	A good prompt has three main parts, which we call the 3 C's. First is Clarity. Be specific. The AI does not know what you are thinking. For example, instead of 'Write about electric cars', try:

Slide : The 3 C's: Context and Constraints

Visual Cue	Narration
An illustration showing a puzzle piece connecting for context, and a ruler or boundary symbol for constraints.	Next, we have Context. This tells the AI the background for your request. For our example, add 'for a sustainable living blog'. The third C is Constraints. These set rules for the output.

Slide : Advanced Prompting: Persona & Structure

Visual Cue	Narration
Two distinct icons: a mask representing persona and a structured grid representing output format.	You can also use advanced techniques. One powerful trick is 'Persona'. Tell the AI who to act as. For instance, say 'Act as an expert travel agent'. You can also guide the output structure.

Slide : Iterative Prompting: It's a Conversation

Visual Cue	Narration
Speech bubbles showing a back-and-forth conversation between a person icon and an AI icon, indicating refinement.	Remember, your first prompt is rarely your last. Treat prompting like a conversation. If the AI's answer is not perfect, ask it to refine. For example, if it gives a slogan, you can ask, 'Can you make it shorter and more modern?'

Slide : Assignment

Visual Cue	Narration
An icon of a laptop or mobile phone with a speech bubble, indicating interaction with an AI chatbot for an assignment.	Now, for your assignment. Open an AI chatbot like ChatGPT or Gemini. Your task is to apply what you learned.

Slide : Acknowledgement

Visual Cue	Narration
Logos of FOSSEE, IIT Bombay, and EduPyramids, with a thank you message.	We hope this tutorial helped you grasp effective prompting fundamentals. This Spoken Tutorial is brought to you by the FOSSEE project. It is from IIT Bombay, in collaboration with EduPyramids. Thank you for watching!
