

Spoken Tutorial – Understanding the 3Cs of Prompting

Title: Understanding the 3Cs of Prompting

Module	Introduction to AI Prompting
Episode	The 3Cs of Prompting
Learning Objective	At the end of this tutorial learner will be able to 1. By the end of this tutorial, you will be able to apply the 3Cs - Clarity, Conciseness, and Context - to write effective prompts for AI tools.
Approx. Duration	7-9 minutes
Outline	• Welcome to the 3Cs of Prompting Tutorial • Learning Objective • System Requirements • Prerequisites • What are the 3Cs of Prompting? • C1: Clarity - Explanation • Clarity Example: Bad Prompt • Clarity Example: Good Prompt • C2: Conciseness - Explanation • Conciseness Example: Bad Prompt • Conciseness Example: Good Prompt • C3: Context - Explanation • Context Example: Bad Prompt • Context Example: Good Prompt • Summary of 3Cs • Assignment • Thank You
Meta Tags	prompting, AI, ChatGPT, effective prompts, 3Cs, AI tools
Pre-requisite Tutorial	This tutorial assumes you have a basic understanding of using a web browser and accessing online tools. No prior knowledge of AI prompting is required.

Visual Cue	Narration
Welcome screen for a tutorial on 'The 3Cs of Prompting', featuring a friendly AI assistant character and three distinct icons representing Clarity, Conciseness, and Context.	Hello. Welcome to this Spoken Tutorial on the 3 Cs of Prompting. Here, we will learn to write good prompts for AI tools. This will help you get correct and useful answers.
A modern graphic displaying 'Learning Objective' with bullet points: 'Apply 3Cs', 'Write Effective Prompts', 'Understand AI Tools'. Stylized icons for each point.	After this tutorial, you will know how to use the 3 Cs. These are Clarity, Conciseness, and Context. You can use them to write good prompts for AI tools like ChatGPT .

Illustration of a desktop computer with a web browser open to chatgpt.com. Icons for Chrome and Firefox are visible, representing system requirements.	To follow this tutorial, you need a computer. It should have an internet connection. Please use a web browser like Chrome or Firefox . We will use ChatGPT for examples, so open chatgpt.com.
A simple graphic showing a user effortlessly navigating a web browser, implying basic computer literacy. A thought bubble says 'No AI prompting knowledge needed!'	You should know how to use a web browser. You should also know how to open online tools. You do not need to know anything about AI prompting before this tutorial.
A visual representation of the '3Cs of Prompting' (Clarity, Conciseness, Context) as three interconnected pillars or gears, leading to an output from an AI model.	The 3 Cs of Prompting are Clarity, Conciseness, and Context. These three ideas help us write prompts . Good prompts give the best answers from AI . Let us learn about each one.
An illustration of a clear, sparkling magnifying glass focusing on a piece of text that says 'Clear Prompt'. Background is blurred jargon.	Clarity means your prompt should be easy to understand. Do not use unclear words or difficult terms. Tell the AI exactly what you want it to do. Also, tell what kind of answer you expect.
A thought bubble from an AI showing a very vague, scattered, and overwhelming array of images related to 'India' (e.g., map, food, culture, history, economy all jumbled together), illustrating a broad and unhelpful response.	Let us see an example for Clarity. Here is a bad prompt : 'Tell me about India.' This is too general. The AI will give a very broad or not useful answer.
A thought bubble from an AI showing a focused and organized summary about 'Economic Challenges in India 2023', with clear headings and concise points. The AI looks pleased.	Now, see a good prompt : 'Summarize the main economic challenges facing India in 2023.' This is very clear. It asks for specific information. You will get a focused answer.
An image of a pair of scissors trimming a long, winding piece of text into a short, straight, and impactful phrase, symbolizing conciseness.	Conciseness means using few words to give your message. Remove words that are not needed. Go straight to the main point. This helps the AI understand without confusion.
A visually cluttered AI screen showing a very long, convoluted prompt. The AI character looks confused, scratching its head amidst too many words.	Here is a prompt that is not concise. It is: 'Generate a long story about a knight, a quest, a princess, and a dragon.' This prompt has many extra words. The AI may get confused.
A clean AI interface showing a short, impactful prompt. The AI character looks focused and ready to respond efficiently.	A concise prompt is: 'Write about a knight saving a princess from a dragon.' It gives the same message. It uses fewer words. The AI can process it easily.

An illustration of an AI model being given a pair of glasses or a headset labeled 'Context', allowing it to see and understand a scene more clearly, moving from a blurry image to a sharp one.	Context means giving background information to the AI . This helps the AI understand the situation well. It gives a more correct answer. Tell the AI its role, how the answer should look, or who it is for.
An AI character shrugging, holding a generic list of '5 Tips for Learning a Language' that could apply to anyone. It looks unsure about the target audience or specific needs.	See this prompt without context: 'Give five tips for learning a language.' The AI does not know who needs the tips. It also does not know what kind of tips are needed. The answer may be too general.
An AI character wearing a 'language tutor' badge, confidently presenting a tailored list of '5 Practical Tips for Beginner Spanish Learners'. It looks knowledgeable and helpful.	With context, the prompt is: 'As tutor, give five tips for Spanish beginners.' Now, the AI knows its role. It also knows who the tips are for. This gives better advice.
A summary infographic showing Clarity, Conciseness, and Context in a clean, professional design, with small icons and keywords for each 'C', leading to a larger icon representing 'Effective AI Prompts'.	In this tutorial, we learned about the 3 Cs of Prompting . They are Clarity, Conciseness, and Context. We saw how these ideas help us write good prompts for AI tools. Remember to make your prompts clear, short, and give enough background.
A notepad with 'Assignment' written at the top, showing three blank lines for 'Prompt 1', 'Prompt 2', 'Prompt 3'. A pencil and an AI assistant encouraging the user.	Here is your assignment. Go to chatgpt.com. Try to write three different prompts for a short story. For each prompt , use Clarity, Conciseness, and Context. See how the AI 's answer changes when your prompts are better.
A 'Thank You' slide with logos of EduPyramids Educational Services Private Limited, SINE, and IIT Bombay prominently displayed, against a professional background.	This Spoken Tutorial is from EduPyramids Educational Services Private Limited, SINE, IIT Bombay . Thank you for joining us!
