

Introduction to Prompting: Your Key AI Skill

Module:	Module 1: Introduction to AI Prompting
Episode:	Episode 2.1: The 3 C's of Good Prompts
Learning Objective:	At the end of this tutorial learner will be able to 1. Identify the three key components of an effective prompt: Clarity, Context, and Constraints. 2. Apply these components to create clear and focused prompts. 3. Refine prompts through iterative conversation for better results.
Approx. Duration:	3-4 min
Outline	• Welcome to Prompting • What You Will Learn • What You Need • System Requirements • Understanding Prompting: Your AI Intern • The 3 C's of a Good Prompt: Clarity • The 3 C's: Context and Constraints • Prompting is a Conversation • Key Takeaways • Your Assignment • Thank You

Pre-requisite Tutorial	Basic computer literacy and access to any AI chatbot like Google Gemini or ChatGPT.

Slide : Welcome to Prompting: Your Key AI Skill

Visual Cue	Narration
An animated graphic with various AI icons like a robot brain, a chatbot speech bubble, and a creative artist's palette, all centered around a friendly 'Welcome!' message.	Namaste and welcome to this Spoken Tutorial on AI Prompting. In today's world, AI tools can do amazing things. To get the best from them, you need to give clear instructions.

Slide : What You Will Learn

Visual Cue	Narration
------------	-----------

A stylized list showing three bullet points with icons representing 'Clarity' (a lightbulb), 'Context' (a speech bubble with background details), and 'Constraints' (a ruler or boundary).	By the end of this tutorial, you will be able to: First, identify the three key components of a good prompt. These are Clarity, Context, and Constraints. Second, you will apply these ideas to write clear and focused prompts.

Slide : What You Need

Visual Cue	Narration
Icons representing a computer, an internet cloud, and a thought bubble with a question mark, symbolizing basic literacy and curiosity.	To get the most out of this tutorial, you should have basic computer skills. You will also need access to an AI chatbot. Tools like Google Gemini, ChatGPT, or Claude are good choices. Most importantly, be ready to practice and experiment with what you learn.

Slide : System Requirements

Visual Cue	Narration
A simple diagram showing a desktop computer connected to the internet via a Wi-Fi symbol, with a web browser icon on the screen.	For this tutorial, you will need a desktop or a laptop computer. Ensure you have a stable internet connection. Any standard web browser like Chrome, Firefox, or Edge will work. No complex software installations are needed.

Slide : Understanding Prompting: Your AI Intern

Visual Cue	Narration
A friendly, cartoon intern character sitting at a desk, surrounded by thought bubbles showing complex tasks being processed quickly. A speech bubble above their head says 'What can I do for you?'	Imagine an AI model as an incredibly smart and fast intern. This intern can do many tasks, but needs very specific instructions. Prompting is simply giving these clear instructions. A good prompt helps the AI understand exactly what you want.

Slide : The 3 C's of a Good Prompt: Clarity

Visual Cue	Narration
------------	-----------

A magnifying glass highlighting a section of text that is clear and concise, contrasting with blurry text in the background. Shows 'Clarity' as a keyword.	A weak prompt gives a weak answer. A great prompt uses three key ingredients, our 3 C's. The first 'C' is Clarity. Be specific with your instructions.
--	---

Slide : The 3 C's: Context and Constraints

Visual Cue	Narration
A Venn diagram showing three overlapping circles labeled 'Clarity', 'Context', and 'Constraints'. The center overlap is labeled 'Excellent Prompt'.	The second 'C' is Context. Tell the AI why you are asking and who the audience is. Adding 'For a lifestyle blog on sustainable living' provides context. The third 'C' is Constraints. These are rules like length, format, or tone.

Slide : Prompting is a Conversation

Visual Cue	Narration
Two speech bubbles showing a back-and-forth conversation, with the second speech bubble showing a refinement or improvement over the first. Illustrated with a person and a robot icon.	Remember, your first prompt is rarely your last. Think of it as a conversation with the AI. You can refine your prompts based on the AI's initial response. For instance, you might ask for a slogan.

Slide : Key Takeaways

Visual Cue	Narration
A concise mind map connecting 'Good Prompt' to three branches: 'Clarity', 'Context', 'Constraints', and a separate branch for 'Iterative Prompting' with an arrow leading back to 'Good Prompt'.	Let's quickly recap what we have learned. To get good results from AI, your prompts need three things: Clarity, meaning be specific. Context, giving background and audience information. And Constraints, setting rules for the output. Also, remember to refine your prompts by having a conversation with the AI.

Slide : Your Assignment

Visual Cue	Narration
------------	-----------

A person looking at a laptop screen with an AI chatbot interface, a thought bubble above their head showing a recipe for masala chai. A checkmark indicates successful completion.	Now for a small assignment to practice your new skills. Open your chosen AI chatbot. Your task is to create a prompt using Clarity, Context, and Constraints. Here is a prompt example: Instruct the AI to act as a chef. Ask for a simple 3-step recipe for masala chai, aimed at new cooks. Finally, request it as a numbered list. Experiment and refine your prompt.

Slide : Thank You

Visual Cue	Narration
A warm 'Thank You' message with logos of EduPyramids and IIT Bombay's FOSSEE project. A cheerful, diverse group of people learning from computers in the background.	Thank you for watching this Spoken Tutorial. We hope you now feel confident in crafting effective AI prompts. This skill will help you use AI tools powerfully.
