

# Spoken Tutorial – Crafting Effective AI Prompts: The 3 C's in Practice

Title: Crafting Effective AI Prompts: The 3 C's in Practice

|                               |                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Module</b>                 | Welcome! If you're not a coder, this is your single most important skill for using AI.                                                                                                                                                                                                                                                            |
| <b>Episode</b>                | 2.1: The Anatomy of a Good Prompt (The 3 C's)                                                                                                                                                                                                                                                                                                     |
| <b>Learning Objective</b>     | At the end of this tutorial learner will be able to<br>1. Apply Clarity to make AI prompts specific.<br>2. Add Context to guide AI responses accurately.<br>3. Use Constraints to shape AI output effectively.                                                                                                                                    |
| <b>Approx. Duration</b>       | 3-4 min                                                                                                                                                                                                                                                                                                                                           |
| <b>Outline</b>                | <ul style="list-style-type: none"><li>• Introduction to effective AI prompting</li><li>• Understanding the impact of vague prompts</li><li>• Crafting a comprehensive prompt using Clarity, Context, and Constraints</li><li>• Comparing prompt outputs to see the 3 C's in action</li><li>• Practical assignment to reinforce learning</li></ul> |
| <b>Meta Tags</b>              | AI, Prompting, ChatGPT, Gemini, Large Language Models, LLM, Prompt Engineering, FOSSEE, EduPyramids                                                                                                                                                                                                                                               |
| <b>Pre-requisite Tutorial</b> | Basic understanding of AI tools like ChatGPT or Gemini. Access to an AI chatbot.                                                                                                                                                                                                                                                                  |

## Script

| Visual Cue                                                                                                                                                                               | Narration                                                                                                                                                                                                                          |

| Title slide with a large, appealing title 'Crafting AI Prompts: The 3 C's', and the module and episode information below it. Visuals of AI brain or chatbot interface in the background. | Welcome to this Spoken Tutorial on Crafting AI Prompts: The Three C's.                                                                                                                                                             |
| Learning Objectives slide with three clear bullet points. A subtle graphic suggesting learning or growth, perhaps a lightbulb or open book.                                              | In this tutorial, you will learn to apply Clarity to make prompts specific.<br><br>You will also learn to add Context to guide AI responses accurately.<br><br>And finally, how to use Constraints to shape AI output effectively. |
| Screen showing a laptop with a web browser open, displaying a generic AI chatbot interface. Emphasize a clean, modern browser window.                                                    | Here I am using a web browser on a computer for this demonstration.<br><br>You can also use a mobile device with a reliable internet connection.                                                                                   |

|                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Person sitting at a desk, looking engaged with a laptop showing a simplified AI chatbot interface. A subtle 'No Coding Needed' text graphic.</p>                                                                                                     | <p>To follow this tutorial, you must be connected to the internet.</p> <p>You should also be familiar with AI tools like ChatGPT or Gemini.</p> <p>No coding knowledge is required for this session.</p>                                                                          |
| <p>A person looking confused or frustrated at a computer screen displaying a generic, unhelpful AI response. A large question mark hangs over the screen.</p>                                                                                           | <p>Have you ever received a generic answer from an AI chatbot?</p> <p>This often happens when our instructions are not clear enough.</p> <p>Today, we will learn to make our prompts better and more precise.</p>                                                                 |
| <p>A graphic showing three interconnected circles or blocks, labeled 'Clarity', 'Context', and 'Constraints'. Arrows show they work together.</p>                                                                                                       | <p>The best prompts almost always include three key ingredients.</p> <p>We call these the Three C's: Clarity, Context, and Constraints.</p> <p>Let's explore each one with a practical, step-by-step example.</p>                                                                 |
| <p>A clear side-by-side comparison: on one side, a chat bubble showing 'Write about electric cars', and on the other, a generic, long, and unfocused text about electric cars. Highlight the generic nature of the output with a '?' or 'X' symbol.</p> | <p>Let's first understand the problem with vague prompts.</p> <p>Typing 'Write about electric cars' into an AI chatbot gives a broad, generic response.</p> <p>This output lacks focus.</p> <p>It isn't tailored to a specific need.</p> <p>Therefore, it isn't very helpful.</p> |

|                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Screen recording showing a user typing the complete 'Excellent Prompt' into ChatGPT or Gemini. The AI then generates the perfectly tailored blog post, highlighting how it adheres to clarity, context, and constraints. Visually emphasize the input prompt and the resulting output, showing its adherence to all specified rules.</p> | <p>Now, let's see how all three C's work together to create an excellent prompt.</p> <p>Open an AI tool, like ChatGPT or Google Gemini, in your browser.</p> <p>Now, type in this complete prompt into your AI tool.</p> <p>The prompt is: 'Write a short blog post, under 400 words, for a lifestyle blog that focuses on sustainable living.'</p> <p>Explain the top 3 benefits of owning an electric car for someone living in a city.</p> <p>Use a friendly and enthusiastic tone, and end with a question to encourage comments.</p> <p>Notice our specificity here.</p> <p>We've clearly defined the topic, target audience, format, length, and tone.</p> <p>This approach leaves no room for generic answers from the AI.</p> <p>Now, press Enter.</p> <p>Observe the AI generating a precise, tailored, and highly useful response.</p> <p>It perfectly meets all our specified requirements.</p> |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>A clear, dynamic side-by-side comparison. On the left, a smaller section showing the 'Weak Prompt' and its generic output. On the right, a larger, prominent section showing the 'Excellent Prompt' and its highly refined, specific output. Use arrows or visual cues to show the transformation and improvement. Highlight key elements of the 'Excellent Prompt' (Clarity, Context, Constraints) that led to the superior output.</p> | <p>Let's visually compare our initial vague prompt with the excellent output.</p> <p>On one side, we have the vague prompt 'Write about electric cars'.</p> <p>Observe its generic response.</p> <p>On the other side is our detailed prompt, incorporating all three C's.</p> <p>See its perfectly tailored result.</p> <p>The difference is striking.</p> <p>This demonstrates the immense power of Clarity, Context, and Constraints.</p> <p>These C's transform AI from a generic tool into your precise and effective assistant.</p> |
| <p>Summary slide with three distinct bullet points for Clarity, Context, and Constraints. Each point should have a small, relevant icon.</p>                                                                                                                                                                                                                                                                                                | <p>Let's summarize what we learned today about effective prompting.</p> <p>Clarity makes your prompts specific and direct.</p> <p>This helps avoid generic replies.</p> <p>Context gives the AI the necessary background and audience information.</p> <p>Constraints set clear rules for the AI's output.</p> <p>These include aspects like length, format, and tone.</p>                                                                                                                                                                |

|                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Assignment slide with the prompt text clearly displayed. An icon of a fitness coach or a workout plan table visually represents the task.</p>                   | <p>Now, as an assignment, try this challenge on your own.</p> <p>Open your AI chatbot.</p> <p>Prompt the AI to 'Act as a fitness coach'.</p> <p>Ask it to 'Create a simple 3-day workout plan for a beginner'.</p> <p>Specify that it's for someone who wants to exercise at home with no equipment.</p> <p>And that it should be a full-body workout.</p> <p>Crucially, instruct the AI to present the plan in a table format.</p> <p>And ensure the columns are: Day, Exercise, and Duration.</p> |
| <p>Acknowledgement slide featuring the EduPyramids logo prominently, along with the text 'EduPyramids Educational Services Private Limited, SINE, IIT Bombay'.</p> | <p>This tutorial is from EduPyramids Educational Services, SINE, IIT Bombay.</p> <p>Thank you for joining this session on effective AI prompts!</p>                                                                                                                                                                                                                                                                                                                                                 |
