

Spoken Tutorial – Effective AI Prompting: Get Better Results

Title: Effective AI Prompting: Get Better Results

Module	Effective AI Communication
Episode	Episode 2.1: The 3 C's of Great Prompts
Learning Objective	At the end of this tutorial learner will be able to 1. Identify the three core components of a good prompt 2. Apply Clarity, Context, and Constraints to improve prompts 3. Compare outputs from weak and strong prompts
Approx. Duration	3-4 min
Outline	• Introduction to AI Prompting • The 3 C's: Clarity, Context, and Constraints • Progressive demonstration of prompt improvement • Comparing weak vs. strong AI outputs • Summary and Assignment
Meta Tags	AI prompting, ChatGPT, Gemini, Claude, prompt engineering, clarity, context, constraints, AI tools, effective communication with AI
Pre-requisite Tutorial	Basic computer literacy, access to an AI chatbot (like ChatGPT, Gemini, or Claude).

Script

Visual Cue	Narration
Title slide: 'Effective AI Prompting: Get Better Results' with a subtle tech background showing AI concepts.	Welcome to this Spoken Tutorial on Effective AI Prompting: Get Better Results.
Learning Objectives slide with bullet points of the objectives.	You will learn the three core components of a good prompt. You will apply Clarity, Context, and Constraints to improve your prompts. Finally, you will compare outputs from weak and strong prompts. This will help you see the difference in quality.

System Requirements slide showing icons for web browser and generic AI chatbot.	For this tutorial, you will need a web browser. You also need access to an AI chatbot like ChatGPT, Gemini, or Claude. I will be using ChatGPT for the demonstrations in this session.
Prerequisites slide listing basic computer skills and internet connection.	To follow this tutorial, you should have basic computer literacy. An active internet connection is also required for hands-on practice. No prior coding knowledge is needed. You will understand and apply these techniques easily.
Person at laptop looking confused, AI chatbot giving generic answer. Text: 'Vague Prompts = Vague Answers'.	Have you asked an AI a question and received a generic answer? This often happens because of a weak prompt. Let's see an example of this.
Slide with three prominent icons representing Clarity (magnifying glass), Context (speech bubble with background details), and Constraints (ruler/boundaries).	Great prompts include three main elements: Clarity, Context, and Constraints. Clarity means specific requests. Context provides background. Constraints set rules. These three C's help the AI understand exactly what you need. They guide the AI to produce more relevant results.
Screen recording showing user typing 'Write about electric cars' into ChatGPT, then displaying a generic, broad output.	Let's open an AI tool, for example ChatGPT. Type this weak prompt: 'Write about electric cars.'
Screen recording of user typing improved prompt with Clarity into ChatGPT, showing a more focused blog post output.	Now, let's make our prompt clearer. We'll specify the format, benefits, and target audience. Type the following improved prompt into the AI.
Screen recording of user typing prompt with added Context into ChatGPT, displaying an output tailored to sustainable living.	Next, let's add 'Context'. Who is the audience for this blog post? Adding 'for a lifestyle blog' gives the AI needed background and perspective.

Screen recording of user typing the full, excellent prompt into ChatGPT, showing a highly specific and well-formatted blog post output.	Finally, let's add 'Constraints' and define a 'Persona' for the AI. We'll tell the AI to 'Act as a sustainable living expert'. We also set a word limit, a friendly tone, and a specific ending.
Side-by-side comparison of the four AI outputs: weak, clear, contextual, and excellent, highlighting the improvements.	Now, look at all four outputs side-by-side. Observe the weak, clear, contextual, and excellent versions. See the transformation from a generic paragraph to a targeted blog post.
Summary slide with bullet points of the 3 C's and their brief descriptions.	To summarize, always aim for Clarity in your prompts. Provide good Context. And set clear Constraints. These three simple steps will help you maximize AI tool results. This makes you more efficient and productive in your work.
Assignment slide with instructions for generating a workout plan using progressive prompting.	Here is your assignment. Go to your AI tool, such as ChatGPT or Gemini. Try to generate a simple 3-day home workout plan for a beginner. First, try a vague prompt. Refine it progressively: add Clarity, then Context, and finally Constraints. Also, ask the AI to 'Act as a fitness coach'. Compare the results. Which 'C' or element made the biggest difference? Note your observations.
