Effective AI Prompting: Your Essential Skill

- Welcome to this Spoken Tutorial on Effective Prompting for AI.

Spoken Tutorial
Developed at IIT Bombay

Learning Objectives

Spoken Tutorial
Developed at IIT Bombay

Learning Objectives

- Recall the three core components of an effective AI prompt.

Learning Objectives

- Recall the three core components of an effective AI prompt.
- Apply advanced techniques like Chain-of-Thought and structured output.

Learning Objectives

- Recall the three core components of an effective AI prompt.
- Apply advanced techniques like Chain-of-Thought and structured output.
- Create clear and specific prompts for both text and image generation.

Prerequisites

Spoken Tutorial
Developed at IIT Bombay

Prerequisites

- Basic computer literacy.

Prerequisites

- Basic computer literacy.
- Access to a Large Language Model (LLM) tool.

Prerequisites

- Basic computer literacy.
- Access to a Large Language Model (LLM) tool.
- Examples: Google Gemini, ChatGPT, or Claude.

AI as a Smart Intern: The Power of Prompting

Spoken Tutorial
Developed at IIT Bombay

AI as a Smart Intern: The Power of Prompting

- AI models are like smart, fast interns.

AI as a Smart Intern: The Power of Prompting

- AI models are like smart, fast interns.
- They need clear instructions to do good work.

AI as a Smart Intern: The Power of Prompting

- AI models are like smart, fast interns.
- They need clear instructions to do good work.
- Prompting is giving these instructions.

AI as a Smart Intern: The Power of Prompting

- AI models are like smart, fast interns.
- They need clear instructions to do good work.
- Prompting is giving these instructions.
- A good prompt leads to high-quality results.

The 3 C's: Clarity

Spoken Tutorial
Developed at IIT Bombay

The 3 C's: Clarity

- Good prompts almost always include:
Clarity, Context, and Constraints.

The 3 C's: Clarity

- Good prompts almost always include: Clarity, Context, and Constraints.
- Clarity: Be specific! AI does not know what you are thinking.

The 3 C's: Clarity

- Good prompts almost always include: Clarity, Context, and Constraints.
- Clarity: Be specific! AI does not know what you are thinking.
- Weak: "Write about electric cars."

The 3 C's: Clarity

- Good prompts almost always include: Clarity, Context, and Constraints.
- Clarity: Be specific! AI does not know what you are thinking.
- Weak: "Write about electric cars."
- Good: "Write a short blog post explaining the top 3 benefits of owning an electric car for city residents."

The 3 C's: Context and Constraints + Persona

Spoken Tutorial
Developed at IIT Bombay

The 3 C's: Context and Constraints + Persona

- Context: Give background. Tell AI why and for whom.

The 3 C's: Context and Constraints + Persona

- Context: Give background. Tell AI why and for whom.
- Better Prompt (with Context): "Write for a sustainable lifestyle blog. Explain top 3 benefits of electric cars for city residents."

The 3 C's: Context and Constraints + Persona

- Context: Give background. Tell AI why and for whom.
- Better Prompt (with Context): "Write for a sustainable lifestyle blog. Explain top 3 benefits of electric cars for city residents."
- Constraints: Set rules. Define length, format, and style.

The 3 C's: Context and Constraints + Persona

- Context: Give background. Tell AI why and for whom.
- Better Prompt (with Context): "Write for a sustainable lifestyle blog. Explain top 3 benefits of electric cars for city residents."
- Constraints: Set rules. Define length, format, and style.
- Excellent Prompt (with Constraints):
"Write under 400 words, friendly tone, end

The 3 C's: Context and Constraints + Persona

- Context: Give background. Tell AI why and for whom.
- Better Prompt (with Context): "Write for a sustainable lifestyle blog. Explain top 3 benefits of electric cars for city residents."
- Constraints: Set rules. Define length, format, and style.
- Excellent Prompt (with Constraints):
"Write under 400 words, friendly tone, end

Giving Examples: Zero, One, and Few-Shot

Spoken Tutorial
Developed at IIT Bombay

Giving Examples: Zero, One, and Few-Shot

- Zero-Shot: You give zero examples. (Most common).

Giving Examples: Zero, One, and Few-Shot

- Zero-Shot: You give zero examples. (Most common).
- One-Shot: You give one example to show a pattern.

Giving Examples: Zero, One, and Few-Shot

- Zero-Shot: You give zero examples. (Most common).
- One-Shot: You give one example to show a pattern.
- Example: "Summarize text like this: Text: 'Sun is a star.' Output: 'Primary celestial body: Sun'."

Giving Examples: Zero, One, and Few-Shot

- Zero-Shot: You give zero examples. (Most common).
- One-Shot: You give one example to show a pattern.
- Example: "Summarize text like this: Text: 'Sun is a star.' Output: 'Primary celestial body: Sun'."
- Few-Shot: You give a few examples for complex patterns.

Advanced Techniques: Chain-of-Thought (CoT)

Spoken Tutorial
Developed at IIT Bombay

Advanced Techniques: Chain-of-Thought (CoT)

- Chain-of-Thought (CoT): Ask AI to "Think Step-by-Step".

Advanced Techniques: Chain-of-Thought (CoT)

- Chain-of-Thought (CoT): Ask AI to "Think Step-by-Step".
- Useful for logic, math, reasoning problems.

Advanced Techniques: Chain-of-Thought (CoT)

- Chain-of-Thought (CoT): Ask AI to "Think Step-by-Step".
- Useful for logic, math, reasoning problems.
- Reduces errors by showing AI's logic.

Advanced Techniques: Chain-of-Thought (CoT)

- Chain-of-Thought (CoT): Ask AI to "Think Step-by-Step".
- Useful for logic, math, reasoning problems.
- Reduces errors by showing AI's logic.
- Prompt: "I have 5 boxes of apples, 12 in each. I eat 3, give away 1 full box. How many left? Think step-by-step."

Advanced Techniques: Structuring Output & Iterative Prompting

Spoken Tutorial
Developed at IIT Bombay

Advanced Techniques: Structuring Output & Iterative Prompting

- Structuring Output: Tell AI the exact format you need (Markdown table, HTML, JSON, list).

Advanced Techniques: Structuring Output & Iterative Prompting

- Structuring Output: Tell AI the exact format you need (Markdown table, HTML, JSON, list).
- Prompt: "List pros and cons of remote work as a Markdown table with 'Pros' and 'Cons' columns."

Advanced Techniques: Structuring Output & Iterative Prompting

- Structuring Output: Tell AI the exact format you need (Markdown table, HTML, JSON, list).
- Prompt: "List pros and cons of remote work as a Markdown table with 'Pros' and 'Cons' columns."
- Iterative Prompting: It is a conversation. Refine prompts based on AI's replies.

Practical Lab: Text Generation Challenge

Spoken Tutorial
Developed at IIT Bombay

Practical Lab: Text Generation Challenge

- Open Google Gemini, ChatGPT, or Claude.

Practical Lab: Text Generation Challenge

- Open Google Gemini, ChatGPT, or Claude.
- Try this prompt: "Act as a fitness coach. Create a simple 3-day workout plan for a beginner who wants to exercise at home with no equipment. The goal is a full-body workout. Present it in a table format with columns for 'Day', 'Exercise', and 'Duration'."

Practical Lab: Text Generation Challenge

- Open Google Gemini, ChatGPT, or Claude.
- Try this prompt: "Act as a fitness coach. Create a simple 3-day workout plan for a beginner who wants to exercise at home with no equipment. The goal is a full-body workout. Present it in a table format with columns for 'Day', 'Exercise', and 'Duration'."
- Pause the video and try this yourself!

Spoken Tutorial

Practical Lab: Image Prompting Challenge

Spoken Tutorial
Developed at IIT Bombay

Practical Lab: Image Prompting Challenge

- Image tools like Midjourney or DALL-E 3 use descriptive prompts.

Practical Lab: Image Prompting Challenge

- Image tools like Midjourney or DALL-E 3 use descriptive prompts.
- Think like an artist: describe visual details.

Practical Lab: Image Prompting Challenge

- Image tools like Midjourney or DALL-E 3 use descriptive prompts.
- Think like an artist: describe visual details.
- Try this: "A close-up, photorealistic image of a cat wearing a tiny detective hat and magnifying glass, sitting in a library. The lighting is warm and cinematic."

Practical Lab: Image Prompting Challenge

- Image tools like Midjourney or DALL-E 3 use descriptive prompts.
- Think like an artist: describe visual details.
- Try this: "A close-up, photorealistic image of a cat wearing a tiny detective hat and magnifying glass, sitting in a library. The lighting is warm and cinematic."
- Use Midjourney or DALL-E 3 if available.

Summary

Spoken Tutorial
Developed at IIT Bombay

Summary

- AI needs specific instructions (prompts).

Summary

- AI needs specific instructions (prompts).
- Good prompts have Clarity, Context, Constraints (3 C's).

Summary

- AI needs specific instructions (prompts).
- Good prompts have Clarity, Context, Constraints (3 C's).
- Use Persona and examples (Zero, One, Few-Shot).

Summary

- AI needs specific instructions (prompts).
- Good prompts have Clarity, Context, Constraints (3 C's).
- Use Persona and examples (Zero, One, Few-Shot).
- Advanced techniques: Chain-of-Thought, structured output, iterative prompting.

Summary

- AI needs specific instructions (prompts).
- Good prompts have Clarity, Context, Constraints (3 C's).
- Use Persona and examples (Zero, One, Few-Shot).
- Advanced techniques: Chain-of-Thought, structured output, iterative prompting.
- Practice is key for effective prompting.

Assignment

Spoken Tutorial
Developed at IIT Bombay

Assignment

- Use an AI tool (Gemini/ChatGPT/Claude).

Assignment

- Use an AI tool (Gemini/ChatGPT/Claude).
- Prompt: "Act as a friendly tour guide for Mumbai. Create a 1-day itinerary for a family visiting Mumbai for the first time. They want to see historical places and try local street food. Include time estimates. Present this as a bulleted list with timings."

Assignment

- Use an AI tool (Gemini/ChatGPT/Claude).
- Prompt: "Act as a friendly tour guide for Mumbai. Create a 1-day itinerary for a family visiting Mumbai for the first time. They want to see historical places and try local street food. Include time estimates. Present this as a bulleted list with timings."
- Observe the output and refine your prompt if needed.
