

Introduction to Tokens and Tokenization

Spoken Tutorial

brought to you by

**EduPyramids Educational Services
Pvt. Ltd.**

<https://spoken-tutorial.org>

Learning Objectives

In this tutorial, we will learn,

- ▶ **Explain what tokens are, how tokenization works, and why tokens are crucial for LLM performance, cost, and efficiency.**

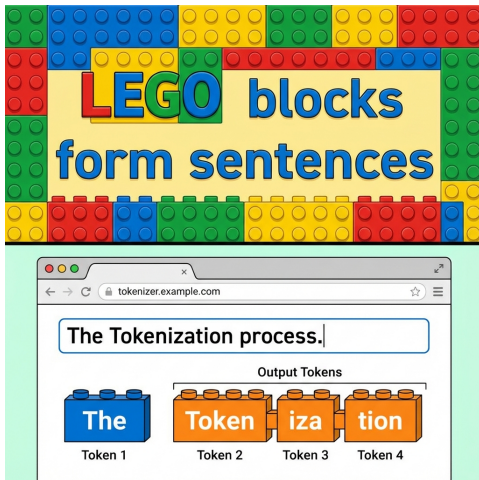

System Requirements

- ▶ **Here I am using a browser on a computer or mobile.**
- ▶ **We will also use an online tokenizer tool.**

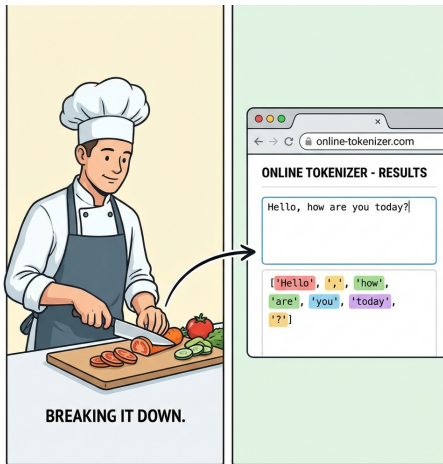

Pre-requisite Slide

- ▶ **Introduction to Generative AI,
Introduction to Prompting**

What are Tokens?

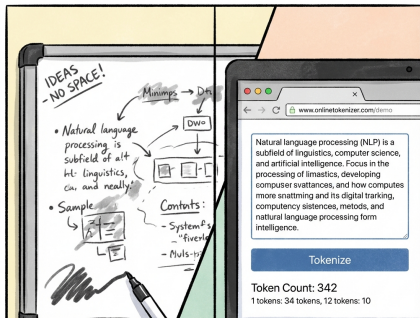

How Tokenization Works

Why Tokens Matter: Context Windows

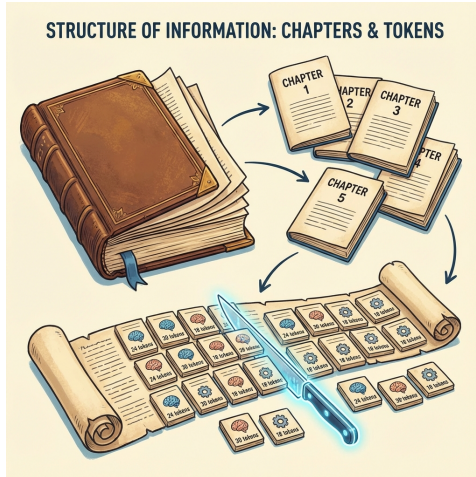

- ▶ LLM's context window is short-term memory.
- ▶ Measured in a fixed number of tokens.
- ▶ Exceeding limit

Why Tokens Matter: Cost

Why Tokens Matter: Chunking

Summary

In this tutorial, we learned that:

- ▶ **With this, we come to the end of this tutorial.**
- ▶ **Tokenization is the process of splitting text into these sub-word units.**
- ▶ **And tokens are critical for context windows, cost, and efficient chunking.**

Assignment

- ▶ Find an online tokenizer tool.
- ▶ Experiment with different types of text: short words, long words, sentences, and paragraphs.
- ▶ Observe how the token count changes.
- ▶ Try to find a sentence that results in exactly 10 tokens.
