Title Slide	Welcome to this Spoken Tutorial on Persona Prompting.
Learning Objectives Slide	In this tutorial, you will learn to define persona prompting , understand how personas influence AI responses, identify practical persona examples, and apply persona prompting effectively.
System Requirements Slide	You will need a computer with internet access. Access to any AI chatbot like ChatGPT or Gemini is also required.
Pre-requisite Slide	Basic understanding of what a prompt is will be helpful. Familiarity with giving instructions to AI tools is also beneficial.
AI chatbot wearing different hats representing roles	Have you ever wished your AI could speak like an expert? Persona prompting assigns a role to the AI . It tells the AI to 'Act as...' a specific character. This changes how the AI thinks and responds.

AI chatbot changing its appearance based on a role	Think of it like an actor playing a role. The actor changes their voice, manner, and knowledge. Similarly, the AI adjusts its tone and expertise. Next, let's see how this shapes the output.
Screenshot of an AI prompt: 'Act as a poet. Write a short poem about rain.'	Open your AI tool now. Type: 'Act as a poet. Write a short poem about rain.' Click Submit. Notice the creative language and imagery. How is this different from a normal response?
Screenshot of an AI prompt: 'Act as a history professor. Explain the causes of World War 1.'	Now, try this prompt : 'Act as a history professor. Explain the causes of World War 1.' Observe the formal tone and detailed explanation. This shows the AI adopting a knowledgeable persona . You can use this for any expert field.
Person thinking about different AI responses, one generic, one specific.	Why bother with assigning roles? Personas provide context and focus. They help the AI give more relevant and accurate answers. This makes your AI interactions much more effective.
Flowchart showing use cases for persona prompting	Use personas when you need specific expertise. Apply them for different writing styles. They are great for creative tasks or problem-solving. Now, let's summarize what we have learned.
Summary Slide	In this tutorial, we learned about persona prompting . We saw how assigning roles changes AI responses. We also explored examples of practical personas . Finally, we understood when to use this technique.
Assignment Slide	Experiment with your AI tool. Ask it to 'Act as a travel agent.' Then ask: 'Plan a 3-day trip to Goa.' Compare this with a normal prompt without a persona .
