

Spoken Tutorial – Misinformation and Deepfakes

Title: Misinformation and Deepfakes

Module	AI Ethics
Episode	03
Learning Objective	At the end of this tutorial learner will be able to 1. Identify how AI generates fake content. 2. Understand the dangers of deepfake media. 3. Recognize the societal impact of misinformation, and 4. Apply strategies for source verification.
Approx. Duration	3-4 min
Outline	• How AI can generate realistic fake content • Risks of deepfake audio, video, and images • Real-world examples and societal impact • Importance of source verification and media literacy
Meta Tags	AI ethics, misinformation, deepfakes, media literacy, source verification, digital manipulation
Pre-requisite Tutorial	Basic understanding of how the internet works. Familiarity with common online media.

Visual Cue	Narration
Title Slide	Welcome to this Spoken Tutorial on Misinformation and Deepfakes.
Learning Objectives Slide	In this tutorial, you will learn, • Identify how AI generates fake content, • Understand the dangers of deepfake media, • Recognize the societal impact of misinformation, and • Apply strategies for source verification.
System Requirements Slide	A device with internet access. A web browser to view examples.
Pre-requisite Slide	Basic understanding of how the internet works. Familiarity with common online media.
AI creating fake content, digital art	Can you always trust what you see online? AI can now create very real-looking fakes. These fakes are called Deepfakes . They can be audio, video, or images.

Neural network generating faces, digital illustration	Deep Learning models learn patterns. They study real faces, voices, and actions. Then, they generate new, fake content. It looks very convincing to us.
Fake news broadcast, digital manipulation	Imagine a fake speech from a leader. Or a fake call from a family member. These can cause great confusion. They can even spread false news.
Manipulated photograph, digital forgery	Fake images can defame people. They can show events that never happened. This changes public perception easily. It affects trust in visual proof.
Person looking distressed at a phone screen	A person's reputation can be ruined. Their privacy can be deeply invaded. This leads to emotional distress. It can harm their personal life.
People arguing over news, societal division	Deepfakes can sway elections. They can create political instability. Trust in news and media drops. This challenges our shared reality.
Magnifying glass over a newspaper, fact-checking	What is the origin of this content? Does it come from a trusted news outlet? Always check multiple reliable sources. Cross-reference information you find.
Person reading news critically, media literacy	Learn to spot signs of manipulation. Look for unnatural movements or voices. Question all sensational content. Developing this skill is very important.
Summary Slide	We covered Deepfakes and their risks. We saw how AI creates fake content. We discussed societal and personal impacts. Remember to verify sources and build media literacy.
Assignment Slide	Think of a recent news story. Try to find its original source. Check if other trusted sources report it. This practice builds your critical skills.
