

Spoken Tutorial – Misinformation and Deepfakes

Title: Misinformation and Deepfakes

Module	Advanced AI Concepts
Episode	Understanding AI's Dark Side
Learning Objective	At the end of this tutorial learner will be able to 1. Understand how AI creates deepfakes, and 2. Identify the risks of deepfake content. 3. Apply methods to spot misinformation.
Approx. Duration	3-4 min
Outline	• What are Deepfakes? • AI Behind Deepfakes • Forms of Deepfake Content • Dangers of Deepfakes • Deepfakes in the News • Impact on Society • Verify Your Sources • Cultivate Media Literacy
Meta Tags	deepfake, misinformation, fake news, AI, media literacy, synthetic media
Pre-requisite Tutorial	Basic understanding of how AI works is helpful. No prior coding knowledge is needed.

Script

Visual Cue	Narration
Title Slide	Welcome to this Spoken Tutorial on Misinformation and Deepfakes.
Learning Objectives Slide	In this tutorial, you will learn to understand how AI creates deepfakes. You will also identify the risks of deepfake content. Finally, you will apply methods to spot misinformation.
System Requirements Slide	You will need a device with internet access. A web browser is also required.
Pre-requisite Slide	Basic understanding of how AI works is helpful. No prior coding knowledge is needed.
realistic fake content generated by AI	Have you seen videos that seem real but are not? These are often called deepfakes. Deepfakes are synthetic media. They are created using powerful AI algorithms.

neural network creating synthetic media	AI uses something called Deep Learning . It learns patterns from many real images. Then it generates new, fake content. This content looks very convincing.
various types of deepfake content	Deepfakes can be audio, video, or images. Audio deepfakes mimic a person's voice. Video deepfakes can swap faces. They can also make people say new things.
risks and dangers of deepfake technology	What happens if fake content looks real? Deepfakes spread misinformation quickly. They can damage reputations easily. They can even influence public opinion.
examples of deepfakes in media	Fake videos of politicians have appeared. These videos spread false statements. Audio deepfakes have been used in scams. They trick people into giving money.
societal impact of misinformation	Deepfakes erode trust in media. It becomes hard to tell truth from lies. This can destabilize societies. It can also cause confusion during events.
person verifying information source	How can we combat these fakes? Always check where information comes from. Is the source trustworthy and reliable? Look for official channels and news.
person practicing media literacy	Develop strong media literacy skills. Question what you see and hear online. Look for inconsistencies in content. Educate yourself on deepfake signs.
Summary Slide	This module covered deepfakes and their risks. We also learned about verifying sources. Remember to always be critical of online content.
Assignment Slide	Find one news article discussing a deepfake incident. Reflect on its impact. Share your findings with a friend.
