Title Slide	Welcome to this Spoken Tutorial on Creating Your Own API Key. This key is your gateway to interacting with powerful AI models.
Learning Objectives Slide	In this tutorial, you will learn to, • Navigate to Google AI Studio's API Key section. • Generate a new API key within a project. • Copy and verify the created API key.
System Requirements Slide	Here I am using a browser on a computer. You will need a web browser (Chrome, Firefox, Edge) and an active Google account.
Pre-requisite Slide	This tutorial requires Module 2: Art of the Prompt and a Google account.
Browser showing aistudio.google.com	Open your web browser. Go to aistudio.google.com.

Screen close-up: Google sign-in page with credentials input fields	Sign in with your Google account. Enter your credentials. You are now logged in to Google AI Studio .
Screen close-up: Google AI Studio dashboard with 'Get API Key' in left navigation panel highlighted	On the left-hand navigation panel , click Get API Key . This section is where you manage your access credentials for Google AI services. You will see the API Key section.
Screen close-up: Google AI Studio's API Key section, 'Create API Key in new project' button highlighted	Click Create API Key in new project . Notice how quickly the key is generated. A new API key will appear, allowing you to build your own intelligent applications.
Screen close-up: Google AI Studio's API Key section, copy icon next to the newly generated API key highlighted	Click the copy icon next to the API key . Think about why securely copying this key is important. The API key is now copied to your clipboard.
Screen close-up: Google AI Studio's API Key section, 'Your API keys' list showing the new API key	At this point, observe the new API key appearing in your list. Look under the Your API keys section. This confirms its successful creation and readiness for use.
Summary Slide	Let us summarize what we did. We navigated Google AI Studio. We generated an API key. We securely copied it for use in projects.
Assignment Slide	For your assignment, create a new Python script. Paste your API key into it. Make a simple API call. Verify its functionality.
