Title Slide	Welcome to this Spoken Tutorial on Creating Your Own API Key.
Learning Objectives Slide	In this tutorial, you will learn to, • Navigate to the Google AI Studio website. • Generate a new API key. • Copy and securely store the generated API key.
System Requirements Slide	Here I am using a browser on a computer. You will need a web browser and an active Google account.
Pre-requisite Slide	To follow this tutorial, you should have Module 2: Art of the Prompt.
Browser showing Google AI Studio interface	Open your web browser. Navigate to the Google AI Studio website.
Browser showing Google AI Studio sign-in page, then dashboard	If prompted, sign in. Use your Google account credentials. You will see the AI Studio dashboard .

Screen close-up: Google AI Studio left-hand navigation panel with 'Get API Key' highlighted	Locate the left-hand navigation panel. Click on Get API Key. You will see the API key management section.
Screen close-up: Google AI Studio API key management section, 'Create API key in new project' button highlighted	Click the Create API key in new project button. A new API key is generated.
Screen close-up: newly generated API key with 'Copy' icon highlighted	Locate the new API key. Click the Copy icon next to it. The API key is copied to your clipboard.
Person at laptop, securely storing API key in a password manager or environment variable	Paste your copied API key. Store it in a secure location. Use an environment variable or a password manager.
Screen close-up: Google AI Studio API keys dashboard showing the newly created API key listed	Verify the API keys dashboard. The newly created API key is listed.
Summary Slide	Let us summarize what we did. We navigated to the Google AI Studio website. We generated a new API key. We copied and stored the API key securely.
Assignment Slide	Now as an assignment, First, try creating another API key from your Google AI Studio account. Then, delete it. Compare the results.
